Policy on prohibited and restricted items

It is the responsibility of sellers to make sure that all items listed under their profile are fully compliant with local laws, as well as Shopee's terms and policies. For your convenience, Shopee has provided a non-exhaustive guideline on what items are prohibited and restricted from our platform.

Useful links below for your reference:

- **Shopee Prohibited and Restricted Items policy:** <https://shopee.com.my/docs/3598>
- **MOH Unregistered pharmaceutical drugs or medical devices:** <https://www.pharmacy.gov.my/v2/ms>

Violations of this Prohibited and Restricted Items Policy may subject the Seller to a range of adverse actions, including but not limited to any or all of the following:

- Listing deletion (penalty point may impose)
- Limits placed on Account privileges
- Account suspension and termination
- Legal actions

Note: Shopee reserves the rights to remove any listings in breach of the aforementioned policy without notice

Shopee's suggestion: Please do not list such listings that are strictly against Shopee's product listing rule. Every 2 prohibited listings deleted by Shopee will lead to 1 penalty point. The more violations a seller is flagged for, the more penalty points the seller will incur.

Misleading Discount

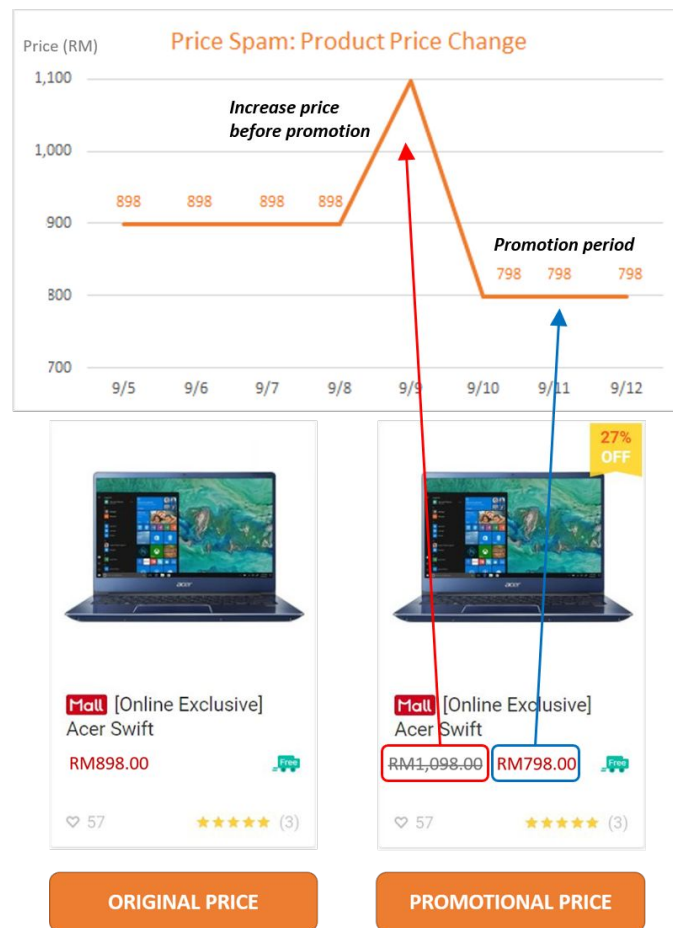

What is misleading discount?

Misleading discount refers to the situation in which sellers **markup product original prices just before a promotion** to exaggerate the discounts given.

Such price manipulation and fake discount is not allowed on Shopee. It creates a **false impression** of the product prices. As a result, buyers feel **cheated and deceived**. They may think that Shopee promotes this behaviour. Buyers may lose trust in Shopee and be reluctant to shop more.

Refer this page for details: <https://seller.shopee.com.my/help/posts/128>

Sellers with misleading discount may have their listings deleted and incur penalty points under the Seller Penalty System.

Duplicate Listings

What are duplicate listings?

Listings are considered duplicates if they feature items that have no significant differences between them. Duplicate listings are strictly prohibited and will be deleted. This ensures a positive browsing experience for all our buyers by preventing any one seller from unfairly dominating Shopee's search results (by posting multiples of the same listing).

Sellers with duplicate listings will incur penalty points under Shopee's Seller Penalty System. Repeated offenders may be frozen.

The following duplicate listing practices are strictly prohibited on Shopee:

- Creating duplicate listings of an item under different user IDs
- Creating duplicate listings of an item under different categories
- Creating duplicate listings of an item with only some modifications to the listing's details (e.g. photo, title, description, price, variation etc.)

To avoid duplicate item listings:

- Ensure listing's details (image, title, price, description, attributes etc.) are unique and clearly differentiated
- List items with variations such as size and color in one listing (not multiple listings)

What are duplicate listings?

Creating duplicate listings of an item under different user IDs

The creation of duplicate listings using different user IDs is strictly prohibited. Sellers should use only one account for the sale of the same item(s).

For cases involving duplicate shops (from the same seller), Shopee will keep the oldest shop and close all the duplicate ones.

Shop A

Shop B

Putting up the same listing under 2 different shops is prohibited.

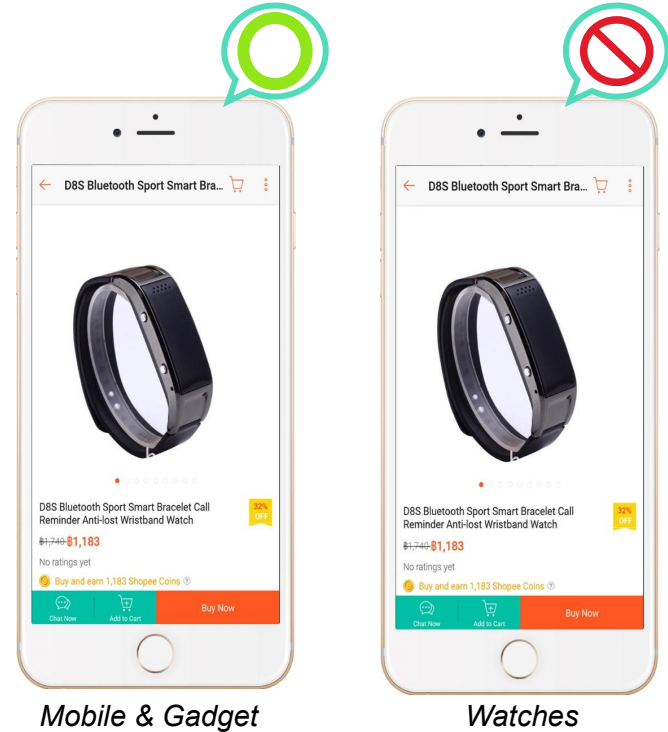

What are duplicate listings?

Creating duplicate listings of an item under different categories

The creation of duplicate listings under different categories is strictly prohibited.

For example, a smart watch should not be posted in both the 'Mobile & Gadget' and 'Watches' categories. Sellers are recommended to publish their listings in a category that is most relevant to the item in question.

Put your item in the most appropriate category. In this case, a smart watch should be categorized under Mobile & Gadgets.

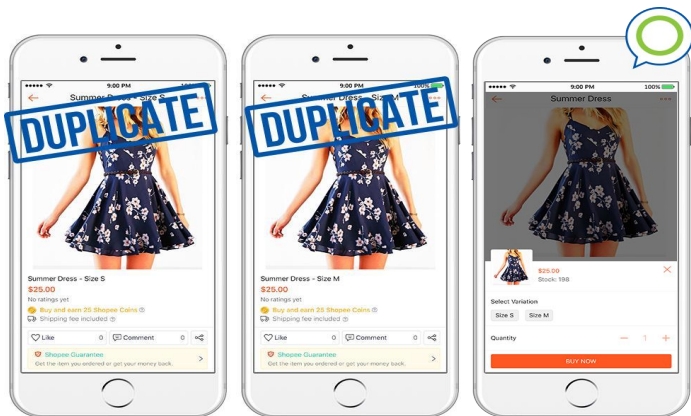

What are duplicate listings?

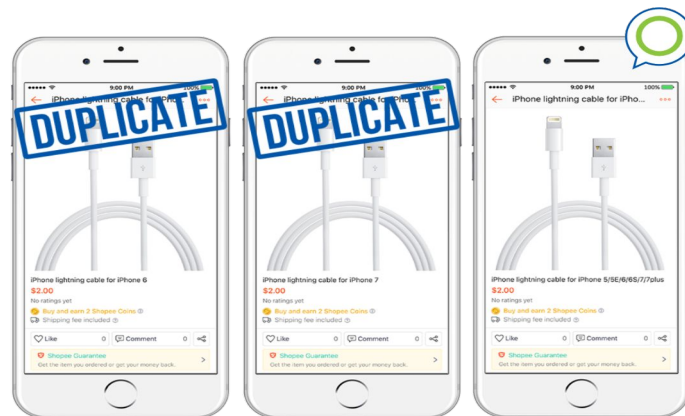

Creating duplicate listings of an item with only slight modifications to the listing's details

Separate listings for variations of the same product should not be created.

Products with the same design/model but with slight variations (e.g. size, colour, dimensions) should still be published as one listing. Sellers can reflect these variations by keying them into product attributes.

Do not create separate listings for the same item. The dress in this example should be placed in one listing with size variations.

Do not create separate listings for identical items compatible with several products or models.

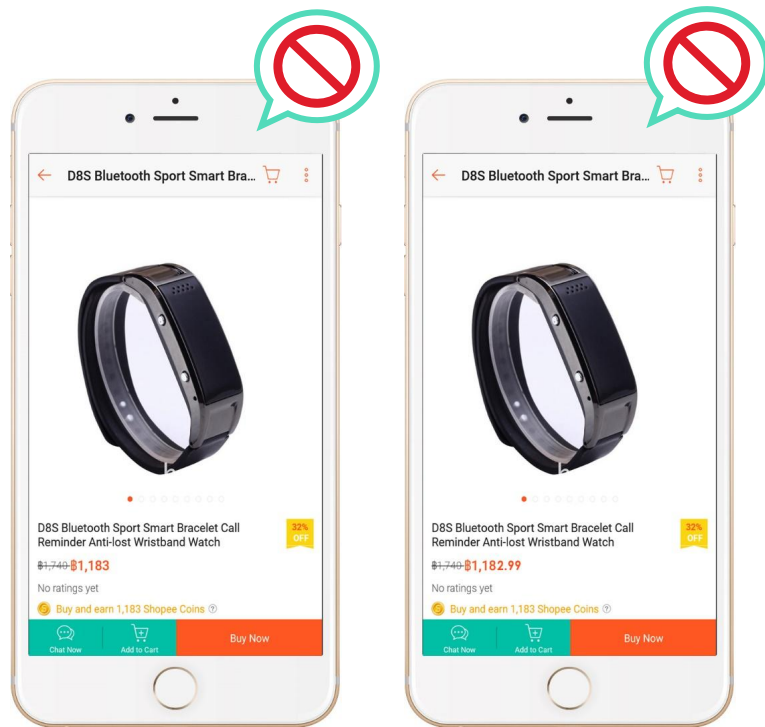

What are duplicate listings?

Same items listed under different prices are also duplicate listings

The same product should not have separate listings at different price points.

If sellers intend to run a promotion (e.g. clearance sale or offer discounts), revise your price by applying a discount tag via My Discount on Seller Center instead.

Do not create separate listings for same item at different price points.

Price Spam

Price Spam

Price Spam (Misleading pricing) practices refers to the act of listing items at extremely low or high prices to get more views, but with no intention to sell the items at the listed price.

Sellers who list their products at extremely low (e.g. RM0.10) or high prices (e.g RM9,999) beyond the actual market value of the product will be identified and removed by the system.

Sellers who engage in misleading pricing practices will incur penalty points under Shopee's Seller Penalty System.

Listing products at extremely low prices with no intention to sell is not allowed

Price Spam

Add-on(s) should be included as part of an item's variation and should not be listed separately

The price reflected in your listing should include the price of your add-on(s). For example, if you are selling a powerbank package – powerbank (worth RM36.80) and a pouch bag (worth RM0.80). Your product listing should include the following variations:

- RM36.80 for smartphone
- RM37.60 for smartphone + phone case

To avoid misleading buyers, add-on(s) should not be listed separately.

Listing add-on(s) separately is not allowed

SPAM

Category Spam

Category Spam

Shopee discourages sellers from listing products in wrong categories. Categories and attributes help to increase the visibility of your product and to provide a better user experience for your buyers. Imagine a supermarket with different sections, you can find item more easily if it is put in the right section. By categorizing your items accurately, you can ensure that your product shows up at the right places.

Category spam are listings that have been placed in the wrong category.

Such behaviour contributes to:

1. Poor search results

2. Bad browsing experience for buyers

Accurate categories help to increase the visibility of your products and ensure that they show up in the right places.

Tips to seller: Category Spam

If your listing is flagged for spam, kindly review the flagged listing and select the correct categories for your product.

Here are some of the useful tips for your action.

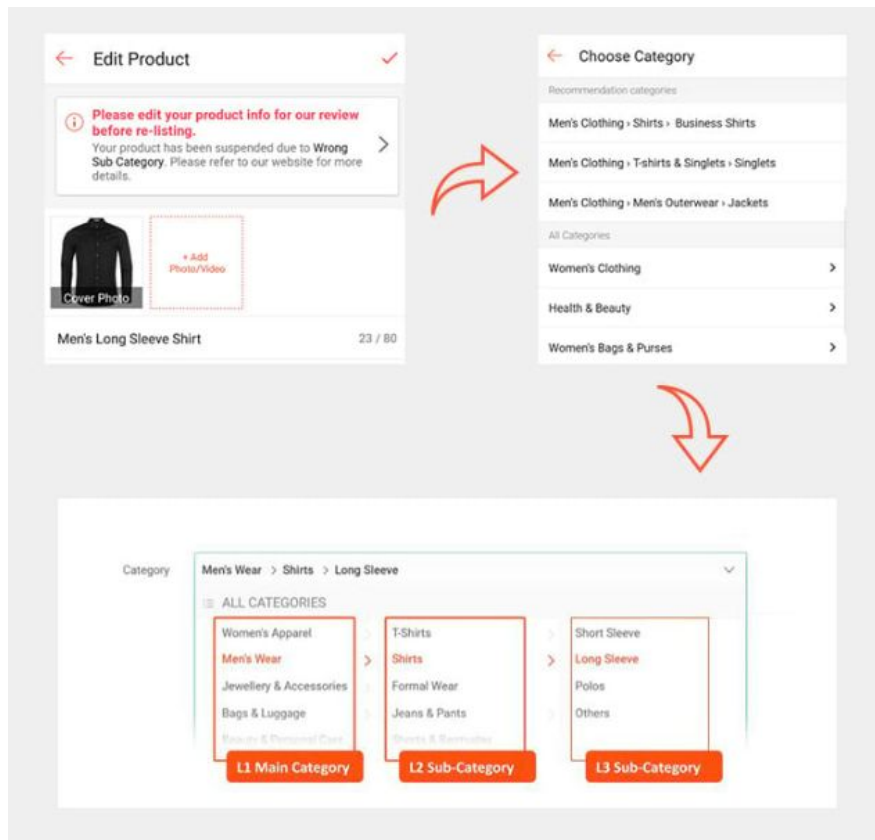

- Find the full Shopee categories list here:
<https://seller.shopee.com.my/portal/categories>
- Locate the right category and sub-category that your item belongs to
- If your listing contains more than one item (eg. combo of phone and phone case), your listing should follow the category of the main item (i.e. phone)

You may refer to this page for more info:

<https://shopee.com.my/events3/code/2659227738/>

If you are unsure which category your item should be under, you can try searching for that type of item on Shopee, and see which category and sub-category it belongs to.
